SUMMARY

Product designer with 7+ years of experience creating multi-platform products across AI, EdTech, crypto, and AR/VR. Owned end-to-end UX/UI design while collaborating with engineering, product, and leadership teams. Built design systems and mobile-first experiences that scaled platforms **to 3M+ users and supported \$66M+ in funding**, including work with Google's Black Genius Academy.

EXPERIENCE

Product designer

Cortex Labs · (Crypto, AI Chatbot)
Contract, Feb 2025 – May 2025

Designed an AI-powered crypto assistant that simplified DeFi and trading operations through natural-language chat flows. Collaborated with engineering to deliver mobile-first onboarding, wallet integrations, and token interactions.

- 01 **Transformed complex crypto actions into guided chat flows** that let users complete swaps, transfers, and portfolio tracking through natural conversation.
- 02 Drove cross-functional decision to educate users pre-wallet-connection and designed the onboarding flow that **cut time-to-first-action by 40%**.
- 03 Redesigned mobile chat UI for small screens, increasing average session duration **from 2.5 to 3.5 minutes** after launch (tracked via product analytics).
- 04 Introduced smart prompts and contextual follow-ups that raised unique queries per session from 4 to 7 (measured over 2-week after launch window).

Product designer

OutRival (Career Karma spin-off product) · (No-Code AI Agent Builder)
Oct 2024 – Feb 2025

Designed a no-code AI builder enabling non-technical users to create and deploy AI agents with a drag-and-drop interface. Translated complex logic and multichannel messaging into simple, visual workflows.

- 01 Led design for a no-code AI platform **MVP delivered in under 2 months**, facilitating alignment between engineering and product on core interaction model, user logic, and visual structure for the drag-and-drop builder.
- 02 Accelerated engineering velocity by owning the product's design system, **building reusable components**, documenting interaction patterns, and establishing usage guidelines that enabled consistent implementation across the team.
- 03 Designed contextual onboarding flows that enabled non-technical users to launch their first AI agent **in under 7 minutes**, validated through internal testing with target user profiles.

Product designer

Career Karma • (EdTech, Career Coaching Platform)

Jan 2019 – Oct 2024

Founding designer behind a multi-platform product helping people explore and choose tech career paths, collaborating with founders, engineers, and growth teams. Users could compare bootcamps, talk to mentors, join live audio rooms, and get personalized guidance.

- 01 Led end-to-end design during **platform growth from 0 to 3M+ MAU**, owning design of onboarding, dashboards, and core user flows that supported user acquisition and retention across mobile and web.
- 02 Partnered directly with CEO and leadership team across Series A, B, and C rounds, translating product vision into investor-ready prototypes and narratives that supported **\$66M+ in funding**.
- 03 **Co-created an edtech platform with Google’s Black Genius Academy** by designing audio-first learning, guided career paths, and integrated coaching tools focused on accessibility and clarity.

UI/UX designer

Visoft • (AR/VR Interior Design Tools)

Oct 2017 – Mar 2019

Designed a suite of mobile AR and VR applications for exploring interior design concepts at real scale and in real time.

- 01 **Designed a natural, hands-free VR navigation model** using head orientation only, removing the need for external controllers and making immersive walkthroughs accessible on smartphones.
- 02 **Created an AR user experience for 3D miniature designs** enabling designers to preview proportions and layouts in real spaces with real-time updates from desktop changes.

CORE SKILLS & TOOLBOX

UX/UI Design & Prototyping: Wireframing, high-fidelity mockups, interactive prototypes, information architecture, persona development.

Design Systems & Interaction Patterns: Component libraries, style guides, accessibility standards (WCAG), responsive & mobile-first design, inclusive design.

User Research & Testing: User interviews, surveys, usability testing, A/B testing, continuous discovery, qualitative and quantitative research synthesis, analytics.

Methodologies & Processes: Design Thinking, Jobs-to-be-Done (JTBD), Lean UX, Agile/Scrum, Product Discovery, iterative delivery, design critique facilitation.

Business & Product Impact: Activation & retention optimization, hypothesis-driven design, MVP & 0-to-1 product design, product strategy contribution.

Leadership & Collaboration: Cross-functional partnership with founders and executives, design system ownership, stakeholder alignment, investor presentations, design review facilitation.

Platforms: Web, iOS, Android, multi-platform and cross-device experiences.

Tools: Figma (Auto Layout, Dev Mode), FigJam, Adobe Creative Suite, Notion, Miro, Jira, Claude, ChatGPT, Perplexity, Figma Make, Lovable.

Domains: Crypto/DeFi UX, AI product design, EdTech platforms, AR/VR interfaces.

EDUCATION

Lviv Polytechnic National University — B.Sc. Computer Science

Sep 2012 – May 2015

LITS (Lviv IT School) — UI/UX Design Certificate

Mar 2015 – May 2015

Interaction Design Foundation — Bootcamp

Nov 2020 – Dec 2020
